THE PAPAL STATES.

ROME, May 5 (via Marseilles).—One thousand Irishmen have left Trieste for Ancona in order to be enrolled in the Pontifical army. Letters deny that M. de Corcelles has been appointed Minister, and state that be will soon return to France.

May 8.—Notwithstanding the statements of the Sardinian journals that the French troops will have entirely evacuated the Papal States before the end of June, it is certain that the Duke de Grammont, in accordance with instructions received from Paris has declared to the Holy See that the French garrison will not leave the Papal territory until the Sovereign Pontiff himself shall have acknowledged that the departure of the French troops can take place without any danger to the tranquillity and safety of his States.

AUSTRIA.

Vienna, May 7, 1860.

The King of Napkes is alarmed, and, being very anxious for the future, he has applied to the Northern Courts for their counsel, sud, probably, for their moral support. The Austrian Government is likely to advise his Majesty to begin his reforms by breaking the arbitrary power of the police, and by enforcing the law of the land; but-such counsel would hardly be of avail, as the feeble monarch is completely in the hands of the designing persons who are around him. The Queen Teresa, who is in uninterrupted correspondence with her relatives at this Court, is believed to be the principal supporter of the present system. That she is the protector of the Jesut party in the kingdom of Naples is a fact that admits of no denial.

Some of the Prussian and Italian papers have learned from the city that there was an understanding between Baron Bruck and M. Robert, the millionaire, who about a month ago blew out his brains. M. Robert was a declared or my to the deceased Minister, and his character was without blemish. It was yesterialy generally related that the property left by Bruck had been placed under sequestration, but the report much requires confirmation.

In reply to the proposals of France, England consents to adopt, as the basis of the Conference, article 92 of the Final act of Vienna, which refers to the neutralization of the districts of Chablais and Faucigny. England reserves, however, the right of making at the said Conference, proposals relative to the mode of this neutralization. This declaration of England is likely to increase the probabilities of the assembling of the proposed Conference.

Vienna, Tuesday, May 8.—The report that Prince Metternich would shortly resign his post as Embassador of the Imperial Court at Paris is entirely unfounded. The inauguration of the newly-organized Council of the Empire will take place in the course of a month. The protocols of its sittings will be regularly published in the official Wiener Zeitung.

Trieste, May 8.—Court Ladolf will emburk this evening for Constantinople, there to assume the functions of Chargé d'Affaires of Austria. Baron Prokesch is expected here in a fortnight. The report that he will be appointed Minister for Foreign Affairs is unfounded.

ways the Privy Councillor Count Apponzi has refused to become a member of the Council of State. The same is stated of Count Barkoczy.

One thousand Inshmen had left Trieste for Ancona, in order to be carolled in the Pontifical army.

HUNGARY.

The Pesth letters of the lat inst. contain detailed accounts of the doings in that capital on Monday last.

"The Requiem was performed in the principal church of the city," says one of the writers, "but the most "interesting past of the mournful ceremony took place "elsewhere." On Sunday Counts Bela and Odon Szechenyi, the sons of the deceased Rungarian statesman, left this city for Pesth by steamer, and on their arrival at Gran they were agreeably surprised to find that Cardinal von Szitowsky, the Primate of Hungary, was to be their traveling companion. After having arrival at Gran they were agreeably surprised to find that Cardinal von Szitowsky, the Primate of Hungary, was to be their traveling companion. After having expressed to the young men his sorrow for the loss which they and Hungary had sustained, the venerable Prelate told them that he intended to celebrate mass on the morrow in honor of their deceased parent. When the Prince-Primate went on shore at Pesth he was received with loud acclamations; but the people, as if by one accord, were silent as soon as they remarked that he was followed by the two young Szechenyis. While the Requiem was being sung in the church the castrum dolaris was surrounded by young men, who were placed in the form of a cross. As almost every person in the chirch held a wax candle, there were probably about 3,000 lights burning at one and the same time. As the clock struck 10 the bells of all the churches in Pesth began to ring, and very soon after the Primate, who was attended by a great number of ecclesiastical dignitaries, made his appearance. After the religious ceremony was over Count Dess wiffy, the President of the Hungarian Academy, and his colleagues accompanied the Primate to his house. On their arrival the Count thanked hi Eminen-a for having done such honor to the memory of the illustrious deceased, and remarked that the Roman Catholic clergy in Hungry had taught the nation how to make their faith accord with their patriotism. The Prelate, who appeared to be much moved, replied that the deep religious feeling of the Hungarians served to emoble and confirm their patriotism. Soon after this the two young Counts Szechenyi arrived, and, taking the hands of the Primate, Soon after this the two young Counts Szechenyi arrived, and, taking the bands of the Prince Primate, attempted to press them to their lips. The Archbi objected to this, but he drew the young men toward him; sad, after having given them his paternal blessing, kissed them on the forehead. Persons who were pre-sent state that few eyes were dry while this touching sent state that few eyes were dry while this touching seene was going on. In the course of the forenoon an immense crowd assembled in front of the rectory, in which the Primate was lodging, and saying Vorosmaty's "Szozat." At the words "Bowed down, but "not broken," the noble ecclesiastic appeared at one of the windows, and, stretching forth his trembling hands, solemnly called down God's blessing on his fellow-countrymen.

PRUSSIA.

Berlin, May 6.—In vesterday's sitting the Minister of Finance, in introducing two projects of law, with the view of obtaining from the Chamber a grant of extraordinary supplies for military purposes, said:

"By these measures the provisional condition of the army, after the mobilization of hast year, is to be main-tained. Their execution requires a credit of 9,000,000 thalers for the Minister of War, from May 1, 1860 to

June 30, 1861. In order to meet these expenses, the additional tax of 25 per cent, hitherto paid, is to be continued until July 1, 1861, and the surplus from 1859 is to be used."

The Ministry, for the present, requests the Chamber to vote the said amount without requiring a special account. Such an account will, however, be laid before the next Landiag. The State Reserve Fund of 12,000,000 thalers will remain untouched. The question whether the Landwehr is to be liable to two or three years' reserve duty, is not considered in the pres ent projects of law.

Berlin, May 9.—The Military Committee of Deputies, in its siting of yesterday, unanimously granted the supplies applied for by the Government for placing the army upon a war footing.

Advices from Italy received here state that the French garrison remains at Rome, and will probably even be reënforced.

The treaty between Hanover and England will be prolonged after the 14th of May, but perhaps for a period of less than three months.

GENEVA, May 5.—The Federal Council has again insisted upon the least possible delay in the assembling of a Conference.

The Cabinet of Turin has made a proposal to the Rederal Council for the construction of a railway through Switzerland, to connect Italy and Germany.

The operations for establishing the boundary line between France and Piedmont commenced on the 1st of May. of May.

BERSE, May 7.—The Federal Council has issued a

fresh circular note, demonstrating the strategic impor-tance of the neutralized provinces for the maintenance of the neutrality of Switzerland.

GENEVA, May 8.—Prince Napoleon arrived here in-cognito on Sunday, at noon, and left at 2 p. m. on Monday; he was accompanied by M. E. de Girardin. This excursion of his Highness has no political object.

Madrid, May 7.—Count de Montemolin and his brother left Tortosa to-day; they will embark on board the steamer Colon, the destination of which is unknown. The Madrid papers, almost without exception, speak of Montemolin's submission, and of the document that conveys it, in terms of great contempt or severe censure. The absolutist Espana pours out a full measure of gall and bitterness. Men, it says, who represent an idea and a party have something to consider beside their own mere will and convenience. It recalls the immense cost in gold and in human life of the Carlist war, wagred for the rights of the younger branch. The contest over, Don Carlos showed dignity in exile, and maintained the honor of his partisans. He resigned in favor of his eldest son, and soon afterward died. The supporters of his principles confided in Count de Montemolin, and, in return for the blood poured out and sacrifices made, they asked only that he should show himself worthy of his name and of his inheritance. That party never expected to be reduced to millity and obliviou, as it has been by the renunciation of him it proclaimed for its King.

FINANCIAL AND COMMERCIAL.

FINANCIAL AND COMMERCIALS.

The accounts from Aberdeen to-day (Monday) state that the defalections of John blakke, the advocate, who has lately absconded, will be about £200,000. At first it was fearthey night be double that amount. He is stated to have obtained advances from the Union Bank of Scotland to the extent of £10,000, but they have numerous securities, and are not likely to lose more than £10,000 or £15,000. Blakke is understood to be accorded. lose more than £10,000 or £10,000.

No gold was taken to the Bank on Saturday. About £30,000.

Ne gold was taken to the Bank on Saturday. About £30,000 Australian gold has been bought for the Continent.

The gold ships amounced to be on their way for England are the Jessie Boyle, which left on Feb. 23 with £30 conces; White Star, 24th, with 14,123 ounces; Result, 26th, with 40,600 ounces; New York of the Star, 24th, with 15,213 ounces; Great Britain, 7th, with 47,472 ounces; Southampton, 16th, with 49,600 ounces; and Dream, 18th, with 6,618 ounces, making a total of 145,624 ounces, including £38,600 by the Norwood; previously reported £682-600. About half of this will be due during the next fortuight.

The details from Austrain regarding the failure of the three large firms at Melbourne are at present scanty, but the total is believed to be very heavy. The stoppage of these houses had, of course, been followed by that of a number of establishments of less magnitude.

The Times ((iffy Article) of May 8 says: The fands opened on Monday without alteration, but were subsequently heavy, on positical rumors. The amouncement of the Great hirtain with £100,000, and the intelligence of a decided rise in the rate of exchange at New-York, were calculated to exercise a favorable influence; but the adverse reports which were perseveringly circulated, but to several speculative sales.

The statements principally current were that the relations of Russia and Tunkey were again assuming a bad aspect, that Pruskia and Irennank are on the eve of a ruture on the Holstein question, and that Mr. Gladdone has found himself compelled to device new finnnish expedients to meet the projected outlay for fortifications, and to prepare for future deficiencies. The variety of these suggestions, nowever, seemed to furnish the best indication of their having been manufactured for speculative purposes. The Lutly News says: According to advices from Australia, the estate of Mesers, E. J. Wheeler & Co. of London, who failed in January last, will not be manufactured for speculative purposes. The Lutly News says:

The Tea Trade, May 7.—The deliveries in London, estimated for the week, were 961,178 h. which is an increase of 41,151 fb compared with the previous statement.

The London Times (City Article), May 9, says: The English funds opened this morning without recovery from the speculative depression of yesterday, and remained till the middle of the doy, when the market assumed a general appearance of firmness, which was well maintained to the close.

Consols were quoted at the close at 954 for money, and 954 m. 954 for the 6th June. After regular hours, there was a still stronger feeling. During the morning several realizations were effected by the public, which caused an increased demand for loans at 4 fb cent, and the subsequent improvement seemed to arise chiefly from the transactions in connection with the settlement of the account, which takes place on the 9th May. A considerable amount of Australian gold was taken to the Bank, but, on the ofter hand, there was a rather large shipment to Brasil.

Foreign Stocka closed with a firm appearance. American Railway Securities continue with a firm tendency, especially the shares of the New 1 ork and Eric, and Philadelphia and Reading, and the bonds of the Pennsylvania Central.

The closing price from Faris failed to arrive. The last quotation received was 7th Sec, showing a fractional recovery.

SATURDAY, May 19-P. M. During the early part of the First Board it was an neunced that the Pacific Mail Company would assume and make good any irregularity or overissue which should be discovered in their transfer department, and that investigations were going on to ascertain the character and extent of the trouble. The opinion of the officers of the Company is that there can be no important overissue of stock, and that it may even resolve itself into a clerical error; but this of course is but mere impression, for the only way by which the facts can be established, is by a comparison of certificates with the books. This process is going on under the supervision of an expert, and it will take some days to arrive at any satisfactory conclusion. It is understood that the discrepancy thus far is less than 500 shares, and the hope is, that it will not exceed this-but in the absence of the Secretary, it is impossible to tell. The tock improved upon this assurance from the Company, and was sold at 90 on the call, although dull and 1 ? cent lower at the close. The feeling in regard to it must be feverish until a full investigation has been made. Following the transactions in Pacific Mail came a brisk and vigorous rally in nearly all of the prominent stocks, and to the surprise apparently of the whole Board the dealings developed one of the strongest markets we have bad during the Spring. The exception to the improvement was Panama, which opening on small sales at 136, dropped down to 130, with scarcely a check on the way, and was afterward down in the street as low as 128, although there was quite a rally in the stock immediately afterward. The cause of this sudden breakdown is stated to be the reception of advices by the Ariel, adverse to an extension of the charter by the New-Granadian Government, but the stock has doubtless been affected by the Pacific Mail disturbance. New-York Central and Erie were both in active demand, and higher, and Hudson River advanced to 48, with eager and vigorous buying. The Western shares were all firmer and better, and the disposition to operate for the rise was strong during the whole session. The most decided advance was in Chicago, Burlington and Quiney, which, from 724 on Friday, went up to 75, and sold freely at the price. At the Se ond Board there was a further advance in New-York Central, Hudson River, Michigan Central, and Rock Island, and a rally of 5 & cent in Panama, followed by a slight reaction at the close of the call. Harlem Prefered was also in better demand, and sold at 41, but was afterward a fraction lower. Freeland and State stocks have been firm during the day, and there is a steady and increasing demand for favo-rite descriptions of Railway bonds, for investment. The transactions of the day furnish satisfactory evi-dence of the stability of the improvement which has been progressing in the stock market, and it is now very generally admitted that the rise is the consequence of reviving business, and the more cheerful prospects of the country. A great many short contracts were covered by the bears during the flurry on Friday, and the operators who have endeavored unsuccessfully to check the upward movement, are gradually changing check the upward movement, are gradually changing their tactics, or reducing their engagements. The closing prices were: for Virginia 6s, 924 #921; Missouri 6s, 84 #844; Canton Company, 214 #2214; Cumberland Coal, 134 #144; Pacific Mail, 90 #904; New-York Central Railroad, 804 #824; Erie Railroad, 224 #23; Hudson River Railroad, 481 @481; Harlem Railroad, 131@131; Harlem Preferred, 401@401; Reading Railroad, 427 @43; Michigan Central Railroad, 50 2504; Michigan Southern and Northern Indiana Railroad, 124 2124; do. The excitement in regard to the Pacific Mail has almost entirely subsided. The investigation of the stock ledger by an expert is going on, but no new discoveries have been made. It is impossible at present to state with certainty what will be the result, but no one believes that the overissue, if any exists, was a criminal one, or that it exceeds a few hundred shares. Various irregularities have been discovered in Mr. Hoffman's accounts, but they appear to be simply the result of carelessness. His friends express the intention of making good to the Company any loss they may suffer by any act of Mr. Hoffman, and the Company have officially notified the Board of Brokers that they will recognize and pay the dividend upon any certificate of stock signed by the officers of the Company, whether an overissue or not. The dividend was paid to-day according to announcement, and the Company

has published a card stating that the transfer books will be opened, as advertised, on Monday next. This does not look as if the Directors believe that any se rious error of fraud exists in the accounts.

The receipts of the Toledo and Wabash Railroad for the week ending May 14 are as follows:

Passengers ... 44,177 81 Freight ... 8,712 34 Total \$12,819 15 \$18,596 96 \$706 81 The Illinois took in specie \$583,827 31, and the City

of Washington \$482,000—in all \$1,065,827 31.

The exchanges at the Bank Clearing-House this morning were \$24,685,916 60. The total exchanges for the week ending this day were \$152,036,663 48, being an average of \$25,339,443 91, against \$25,270,460 67 for the week ending on Saturday last.

The Money market remains without change worthy of notice. There is, perhaps, a little more activity in call leans, but the supply of money is in advance of the wants of borrowers at 5@7 & cent, and in some cases still lower rates are accepted. Paper of first class is quite scarce, and goes at quite as low rates as have been heretofore quoted. Sixty-day acceptances are passed freely at 5 P cent, and six-months' acceptances at 51 251 \$\varphi\$ cent. The Specie movement during the week has been in favor of the Banks, and the eserve ought to show an increase. The California eccipt of \$1,242,000 has counted during the whole week, and the domestic current has been favorable, onsiderable amounts baving been received from neighboring cities and the West. The Sub-Treasury has bsorbed about \$300,000, and the shipment of to-day s about a million, which does not, however, count in he average. It does not appear that the loans can how any increase, and, altogether, the Bank Statement promises to be quite satisfactory.

The exports of specie from this port for the week ending this day were as follows:

The foreign advices by the Adriatic are generally favorable. Consols had an upward movement, and sold at 95%, notwithstanding various disturbing rumors set afloat by the bear jobbers. Cotton was in fair demand and steady, while Breadstuffs were quiet. Money was working easier, and the tendency of the rate of interest was downward. The London Times,

of the 9th, says:

The English fonds opened this morning (May 8) without recovery from the speculative depression of yesterday, and remained till the middle of the day, when the market assumed a general appearance of firmness, which was well maintained to the close. Consols for money were first quoted at 95:7954, and the ultimate bergains were at 954 for money and 954 4954 for the 6th of June. After regular hours there was a still stronger feeling.

cith of June. After regular hours there was a still stronger reeling.

During the morning several realizations were effected by the public, which caused an increased demand for loans at 4 P cent, and the subsequent improvement seemed to arise chiefly from the timeactions in connection with the settlement of the account, which takes place to morrow. A considerable amount of Australian gold was taken to the bank, but on the other hand, there was a rather large shipment to Brazil. Bank Stock left of at 227; Reduced and New Three 4P cents. 395 4954; India Stock, 220; India Five 4P cents, 1964; Rupe-paper, 394 2044; India Stock, 230; India Five 4P cents, 1964; Rupe-paper, 394 2044; India Bonds, 19 495 discount, and Fachequer bills. 4 277 premium.

Foreign stocks have been in moderate demand, and closed with a firmer appearance.

The closing price from Paris this evening failed to arrive. The last quotation received was 716. 5c., showing a fractional receiver.
